AMENDMENT "A"

Hon. Assistant Commissioner of Patents

Washington D.C. 2023

SIR:

Transmitted herewith is an amendment in the above-identified application.

Additional claim fee is required.

The fee has been calculated as shown below.

S I R:

This Amendment "A" is filed in response to the Office Action of January 9, 2002. Please reconsider the application in view of the amendment and remarks presented below.

IN THE SPECIFICATION

Please replace the paragraph beginning at page 3, line 17, with the following replacement paragraph:

A1  
--However, for a CCD solid-state imaging device of a type of giving a sensitivity in an ultraviolet region having a wavelength of, for example, 400 nm or less, since the device uses a protective film allowing ultraviolet rays to pass therethrough, the ultraviolet rays enter gates not shielded by a metal film, for example, an output gate and a reset gate. When ultraviolet rays enter an output gate and a reset gate, a threshold voltage  $V_{th}$  is shifted, to cause a problem that the transfer and reset of electric charges cannot be performed.--

Please replace the paragraph beginning at page 4, line 13, with the following replacement paragraph:

A2  
--To achieve the above object, according to an aspect of the present invention, there is provided a solid-state imaging device having a gate structure including an oxide film and a nitride film, including: upper layer films allowing ultraviolet rays having a wavelength of 400 nm or less to pass therethrough; and a metal made shield film formed in such a manner as to cover a region of the gate structure including an oxide film and a nitride film, excluding a light receiving portion and a transfer portion, of the solid-state imaging device.--
